

MF-FAC390A 自动精装书本上壳压平压槽联动线 (一拖二) ★

Auto Book Casing in & Joint Forming line (One drag two)

■ Main features:

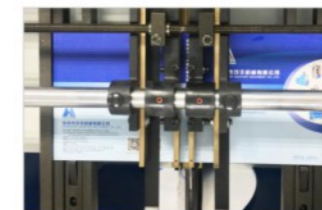

Model MF-FAC390A is based on model MF-FAC390, with two stations of pressing & creasing unit, its speed is greatly increased. It is widely used for notebooks, photo books, picture books and other hard cover books. It adopts feeder for auto cases delivery with Cases creasing function; automatically cases in block with alignment and pressing device to ensure a precise casing in effect; automatically presses and creases the book; and automatically delivers the finished products. It is a good partner for hard cover book production.

■ 主要功能

MF-FAC390A 一拖二自动上壳压平压槽联动线是MF-FAC390的增速版。本机广泛应用于笔记本、绘本、相册、精装书籍等产品。本机采用飞达系统自动送壳兼有书背加热预压成型功能、自动套壳扶正压紧装置、自动压平压槽、自动收集成品，极大节省了人工成本；是精装书本生产的得力助手。

Auto Pushing Cases
自动推送书壳

Cases Creasing with heating
书背加热预压成型功能

Individual control system
独立操作台

Double Gluing
双重上胶

Two stations of Pressing & Creasing
双工位压平压槽

Auto book collector
自动收料
